## Special Issue Information

Dear Colleagues,

it is our great pleasure to announce the papers collection related to the 3-day International Conference on Materials Science, an international meeting on physics, chemistry and engineering of materials scheduled on October 26-28, 2022, in Verona, Italy.

The scope of the conference is to bring together scientists from different areas of Materials Science, physicists, chemists, engineers, with the opportunity to exchange ideas, advance knowledge and discuss the latest trends in the field.

The conference's topics are related to all aspects of scientific research of advanced and functional materials, such as nanomaterials, electronic and photonic materials (semiconductors, dielectrics, liquid crystals, ionic solids), ferroelectric and piezoelectric materials, ferromagnetics, multiferroics, thin-films and coatings, metals/alloys and composites, glasses, catalytic materials, polymers, energy materials, bio- and organic materials, including both experimental and theoretical aspects.

Prof. Alexander M. Korsunsky

Prof. Neeru Bhagat Banerjee

Prof. Tea-Sung (Terry) Jun

Prof. Sławomir M. Kaczmarek
